

# Design Contest

## The winner:

JON WILLIAMS, Tempe, AZ.

Steve, Brian and Jon were among the many rocketeers who designed their own versions of the "Star Wars" X-Fighter. We combined the best elements of each to create this really super flying model. Each winner received a Saturn V kit.

You could be the winner of the "Rocket Times Design Contest" if you like to design your own rockets! Build your own imaginative "Bird" from Centuri Rocket Parts. Send us a photo of it along with a simple plan and parts list.

This is an on-going contest. Each winning entry is published in the next "Rocket Times"; which accompanies the mail-order catalog.

## Prize

The winner will receive a prize of his or her choice . . . any ONE product from the current Centuri catalog! It can be any model rocket product we make . . . right up to the fantastic Saturn V kit!

## Contest rules

1. Entries must consist of a photograph of the model, and a drawing which includes a parts list, and your name and address.
2. Entries must be flight worthy and not copies of kit designs produced by model rocket manufacturing companies.
3. Entries become the property of Centuri and can not be returned.
4. Employees of model rocket companies and their families are not eligible.
5. Entries judged on originality, neatness, practicality and completeness.
6. Do not send the actual model.
7. Send as many DIFFERENT entries as you like, but no duplicates.
8. There is no deadline. A winner is selected just before each issue of Rocket Times goes to press, and notified by mail.
9. Specify which prize you want if you win.

## This design:

This design is not a scale model, but modified for simpler building and more stable flights. We have no plans for it, other than these. Colors: white with red trim. Recommended engines: A8-3, B4-4, B6-4 or C6-5. Standard 16" parachute recovery. If you make one, be sure to keep fins way back, and add the rudders for stability.

## Design tips

- Take your time to do a good job.
- Use your imagination.
- Don't copy existing designs.
- Try some really experimental ideas.
- Avoid large fins too far forward.
- Choose from available parts.
- Make your entry clear and readable.
